When to Build

Sometimes custom is really what you need.

Primary Reasons

- You need a custom interface
- You have complicated data needs
- You want to sell to others
- You need other bells/whistles

2

What Does it Take?

What roles are needed to create a successful product?

Building Successful Digital Products is Really, Really Hard!

What roles do you need?

Product/Project Manager

UX Researcher/Designer

Visual Designer

QA Tester

Front-End Developer

Back-End Developer

Build resource models

Inhouse resources

This is often the most expensive option if you're going to maintain a full team

Outsource to Agency

Look at agencies with expertise in the space or with the technologies you're looking at using

Combination

Depending on the type of project and the goals, this may be the preferred model for many organizations

3

Respective Benefits and Limitations

Of Insourcing v. Outsourcing

Insourcing

Strengths

- Subject matter expertise
- Understanding of clients

Limitations

- Time!
- Lack of resources
- Not knowing what you don’t know

Outsourcing

Strengths

- Ability to scale
- Native expertise
- Resources
- Can teach processes that can be replicated

Limitations

- Lack of subject matter expertise
- Over-reliance risks not building the skills internally
