Content that Sticks

by Kaitlin E. McGee

In our <u>most recent Lunch and Learn program</u> with Angela Dunz about using LinkedIn for business development, she pointed out that the "stickiest" content on LinkedIn right now is video and podcast material.

If you've never posted video or audio content on social media for marketing purposes, you may be afraid that it will take too much time, not look "perfect," or that you don't have the tools to create something good.

Over the past year, I've been experimenting with video content on LinkedIn and can tell you that it's easier than you think. You can also create quality video and audio content using only free tools. The tools I use are:

- Zoom
- Descript
- ChatGPT

To create a <u>video demo with ChatGPT</u> recently, I followed the following steps:

- 1. I started a meeting on Zoom, shared my screen, and recorded myself using ChatGPT to summarize and analyze legal briefs in a disciplinary case in front of the D.C. Court of Appeals.
- 2. Then, I uploaded that video to the free version of Descript and edited the content to make it shorter and more engaging. (30-60 seconds is optimal)
- 3. Since Descript uses AI to create a transcript of the video, I copied the transcript into ChatGPT and asked it to help me draft a LinkedIn post to accompany the video.
- 4. I posted the video to LinkedIn directly and edited the auto-generated captions to make sure they were correct.

If you need extra encouragement to explore video, you may want to join a group like <u>Videosocials</u> to get constructive feedback on your content. Another option is to pair up with another attorney looking to create video content and present to each other on Zoom and record it. You'll have built-in accountability and the benefit of feedback before you post your content.

If you try out video, send us a note and let us know how it goes. You can reach Dan and me at PMAS@dcbar.org.
